I.

Aims and Scope of the 2016 Minnesota Protocol

1

II.

International Legal Framework

3

A. The Right to Life

3

B. Accountability and Remedy

4

C. The Triggering and Scope of the Duty to Investigate

5

D. Elements and Principles of Investigations

7

1. Elements of the duty to investigate
2. Relevant international principles and codes
3. The participation and protection of family members during an investigation
4. Investigative mechanisms

7

9

9

10

III.

Professional Ethics

11

IV.

Conduct of an Investigation

12

A. General Principles of Investigations

12

B. The Investigation Process

12

1. Collecting and managing data and materials
2. Important physical locations, including the death/crime scene
3. Family liaison
4. Understanding the victim
5. Finding, interviewing and protecting witnesses
6. International technical assistance
7. Telecommunications and other digital evidence
8. Financial issues
9. Chronology of events

13

13

15

15

15

16

17

17

17

C. Interviews and Witness Protection

18

1. General principles
2. Security and well-being
3. Recording interviews

18

18

18

D. Recovery of Human Remains

19

1. General principles
2. Labelling
3. Inventory
4. Intact bodies
5. Skeletal remains on the surface
6. Buried bodies/skeletal remains
7. Considerations in the recovery of buried remains

19

20

20

20

21

21

E. Identification of Dead Bodies

21

1. General principles
2. Visual recognition
3. The scientific approach to identification
4. Events with multiple deaths
5. Conclusions about identity

21

21

22

22

23

F. Types of Evidence and Sampling

24

1. General principles
2. Human biological evidence
3. Non-biological physical evidence
4. Digital evidence
5. Forensic accounting
6. Soil/environmental samples

24

24

25

26

26

26

G. Autopsy

27

1. General principles
2. The role of radiological imaging in investigating potentially unlawful death

27

28

H. Analysis of Skeletal Remains

29

V.**Detailed Guidelines****A. Detailed Guidelines on Crime-Scene Investigation**

1. Introduction
2. Photographic documentation
3. Measurements
4. Note-taking/data collection and compiling an inventory

B. Detailed Guidelines on Interviews

1. Introduction
2. Preparation and setting
3. Starting the interview
4. Fact-finding
5. Concluding the interview
6. Additional guidance when interviewing a suspect
7. The role of interpreters

C. Detailed Guidelines on the Excavation of Graves**D. Detailed Guidelines on Autopsy**

1. Background and key principles
2. The clothed body
3. External examination
4. Internal examination
5. Further testing
6. Concluding the cause of death
7. The autopsy report
8. Autopsy signs of possible torture

E. Detailed Guidelines on the Analysis of Skeletal Remains

1. Introduction
2. Infrastructure for the analysis of skeletal remains
3. Preparing skeletal remains for analysis
4. Establishing a biological profile of the remains
5. Remaining analysis and report
