Abstract	6
List of Figures	9
Acronyms	10
1 Introduction	11
2 Approaches to understanding urbanisation and climate change	13
2.1 Urbanisation as a global and regional process	14
2.2 Urbanisation as a transformation of social and ecological landscapes, structures and relations	14
2.3 Urbanisation as a transformation of production, consumption, life-styles and values	15
2.4 The city as a system	15
2.5 Urbanisation dependence on systems of infrastructure and technology	15
2.6 Urbanisation, climate change and planetary boundaries	16
2.7 Urbanisation and rights	16
2.8 Summary	16
3 History and trends of urbanisation in Thailand	17
4 Drivers of urbanisation in Thailand	27
4.1 Transition from agriculture – absorbing labour surplus, creating internal economic demand and markets	27
4.2 Regional economic dimensions	29
5 Changing patterns of urban vulnerability, poverty, and wellbeing	30
5.1 Patterns of urbanisation and infrastructure development have created new vulnerabilities	30
5.2 Urbanisation and changes in livelihoods and community	32
5.3 Changes in urban communities	33
5.4 Characteristics and causes of poverty and vulnerability	34

<b>6</b>	<b>Approaching climate thresholds</b>	<b>38</b>
<b>7</b>	<b>Challenges of governance, policy, and planning</b>	<b>42</b>
7.1	National policy – urban visions	42
7.2	The effectiveness of governance – the land use plan	43
7.3	Justice and equity considerations	45
<b>8</b>	<b>The way forward</b>	<b>47</b>
8.1	Consequences and implications of current trajectories	47
8.2	Realising urban visions of the future – specific options; a new way of governing urbanisation in the future	49
<b>9</b>	<b>Conclusion</b>	<b>52</b>
	<b>References</b>	<b>53</b>

# List of Figures and Tables

Figure 1: Thailand’s urbanisation level in a comparative perspective (2010)	17
Figure 2: Registered and census populations for Bangkok and the BMR 1960-2010	20
Figure 3: Bangkok’s population, urban area and density 1850-2002	21
Figure 4: Population in Chiang Mai	22
Figure 5: Two maps of Chiang Mai	23
Figure 6: Map of Chiang Mai showing traffic flows at target locations near key facilities, services, and employment centres	24
Figure 7: Sector breakdown of the economy of Bangkok and its neighbouring provinces (contribution to Gross Provincial Product at current market prices in million baht)	28
Figure 8: A graph showing the water capacity in the Huay Luang reservoir (volume of water in million cubic metres on the y-axis and months on the x-axis).	41
Table 1: Academics and researchers involved in the research project	5
Table 2: Structure of Thailand’s economy in 2011	18
Table 3: Urban Population in Mekong Countries	18
Table 4: The classification of Thai local governments (excluding the Provincial Administrative Organisation)	19
Table 5: Average land prices in major cities in Thailand	20
Table 6: History of urbanisation in Hat Yai	25
Table 7: Annual rainfall (mm) and number of wet days in Udon Thani	40
